POWDERLY'S ADDREES.

General Master Workman Pownentr's address to the General Assembly of the Knights of Labor vesterday is a sound and sensible document. It is evident that Mr. POWDERLY is the right sort of a man to head such an organization, and if his course were accepted as the guide of the action of the body it would be well for its prosperity and for the cause of labor generally.

Mr. Powdenty has no fear that the falling off in membership will injure the order. He believes that, with good management, the order will become more powerful and more popular than ever. He gives some excellent advice in relation to strikes, "We must teach men what it is that creates a necessity for a strike,' "They must be taught to strike effectively against the system which permits gambling in money, in land, in railways, and in the very food which is withheld from the mouths of millions at the sound of the stock broker's ticker."

This is good advice. Let the professional labor agitators who seek to make a living without work as champions of the workingman stand saide. Let labor organizations follow the leadership of such men as General Master Workman Pow-DERLY and Chief ARTHUR and the condition of the workingman will be speedily improved and his rights firmly established.

THE ANGLO-AMERICAN ALLIANCE.

The English press is evidently annoved at the growing favor with which American women are regarded by marriageable Engglishmen. The CHAMBERLAIN - ENDICOTT wedding seems to have stirred the bile of the British journalist even more than the union of the Duke of MARLBOROUGH with a wealthy and buxom American widow.

We can see no reason why the wedding which took place at Washington yesterday should be objectionable to the English, when Americans are contented to say nothing but pleasant things about it. The bridegroom certainly has the best of the bargain. He is rapidly approaching the sixties. He has secured a wife in the bloom of youth, handsome, captivating, refined and accomplished.

But when the English newspapers criticise the American girl as she appears and acts in society, and pretend to compare her unfavorably with the Eritish wife, they become ridiculous. An American woman is more attractive, more self-possessed, more refined and by far more intelligent than the average Englishwoman, who is generally too breadand-butterish as a girl and too beef-eating and beer-drinking as a dowager.

A POLICE COURT EPISODE.

Miss Many Anderson's ardent admirer. Mr. JAMES M. DOUGHERTY, WAS YEsterday committed to the care of the Commissioners of Charities and Correction for examination as to his sanity. We are compelled to admit that this was a proper disposition to make of his case. As we have already said, to fall in love with the charming Many is not to be considered an evidence of lunsey, but rather of sound sense. The unhappy James, however, not only adores MARY, but believes that MARY loved him in return, and a man who really imagines that he has touched Many's marble heart may fairly be assumed to be out of his mind.

The stricken Dougneary was examined and committed by Judge Durry. In the course of the examination he expressed the belief that the Justice would act as he had acted if he deeply and vainly loved a beautiful "No, no!" protested the Judge. "I might admire greatly and love deeply, but my judgment tells me I should not give the obect of my affection any annoyance. Reme m. bering a recent romance, there was a sensation in the court as the Judge uttered these words. The detective turned his head aside. The burly doorkeeper of Jefferson Market Court became absorbed in the contemplation of a knot in the wooden flooring. A sympathizing expression passed over the countenances of the attendant policemen. Judge DUFFY blew his nose sonorously, burying his face for a few seconds in his ample bandarma pocket handkerchief, and then the examination was resumed.

Count Von der Gols, Son of Germany's Cavalry General, Charged with Fraud. Count Otto von der Golz, favorite son of Gen. Carl von der Golz, Germany's great cavalry leader, is in Ludlow Street Jail on a charge of obtaining money under false pretenses.

The Count is but twenty-eight years of age and has run through a fortune of over \$100,000 since he came of sge. By his extravagance he incurred his father's anger and came to New York with about \$5,000. He ran through with this and became indebted for money loaned and for board to Dr. de Plasse of 28 West Twenty-fourth street and to Mr. Schmaiz, a fellow boarder. Schmaiz and dell'iasse claim that they trusted the young count on his statement that he had an income of \$1,000 a month, which you der Goit denies.

Wonderfully Interesting.

[From the Scranton (Pp.) Truth.]
The question put to the readers of the New York EVENING WORLD as to the best method of dispos from castle outlders, and the replies, grave, pa thetic, humorous of sarcastic that appear each evening form an interesting department in that bright publication. Hundreds of suggestions show a spirit of philanthropy on the part of the writers that gives evidence that the world at large would be better off if they could become possess of imaginary millions, while other opinions, if serious, go to prove the old adage that the fool and his money would soon part company. All classes and stations in life seem to be repsesented. One woman says that if she had a million she would stop washing clothes for other people; another party would apply the sum towards suppressing polygamy in Utab, and so the list might be contin ned. The sporting man, the politician and the baseball crank are also represented to a marked degree among the correspondents. Upon the whole the idea has proven a source of much amuse-ment for the readers of THE EVENING WORLD and has furnished perhaps a greater variety of opinions than any subject ever offered for suggestion in
